ECONOMIC INDICATORS OF THE FARM SECTOR: STATE INCOME AND
BALANCE SHEET STATISTICS, 1981. National Economics Division,
Economic Research Service, U.S. Department of Agriculture.
ECIFS 1-2.

ABSTRACT

The five leading States for farm cash receipts in 1981 were California, at \$13.9 billion; Iowa, at \$10.7 billion; Texas, at \$10.1 billion; Illinois, at \$7.6 billion; and Minnesota, at \$6.9 billion. Texas was the leading State in farm cash receipts for cattle and calves at \$4.1 billion, Wisconsin for dairy products at \$3 billion, Illinois for soybeans at \$2.3 billion, Iowa for corn at \$2.7 billion, Kansas for wheat at \$1.3 billion, Iowa for hogs at \$2.5 billion, and California for eggs at \$398 million. Accounts are presented for farm income and the farm balance sheet by State, including and excluding household assets, debts, income, and expenses.

Keywords: Farm assets, farm debt, net farm income, returns to operators.

SALES
INFORMATION

The Economic Indicators of the Farm Sector series is available on a subscription basis. Five separate reports are published annually. Subscription rates are \$13 domestic; \$16.25 foreign. Send check or money order payable to "Superintendent of Documents" to:

PREFACE

This report is one of four in the Economic Indicators of the Farm Sector series, which includes longstanding data series such as farm income and the balance sheet of the farm sector. The series is in the process of being updated to reflect the changing nature of today's farm sector. This issue provides updated and revised data by State.

State Income and Balance Sheet Statistics, 1981, corresponds to the national data published in Income and Balance Sheet Statistics, 1981, disaggregated to the State level except in a few instances where new information was available and some State data differ slightly from that published in the national publication. Data are reported at the State level for farm income and balance sheet accounts including and excluding farm households.

One major feature is the separation of the operator's household and dwelling from farm production transactions, assets, and debt. This format, planned for the years ahead, is more appropriate for expanding the aggregate accounts into sub-sector groups.

All of the income estimates in this report are on a calendar year basis. Many are used as basic data for the State and regional personal income estimates and the national income and product accounts of the U.S. Department of Commerce.

The data, while mainly based on information from the Statistical Reporting Service and the census of agriculture, also include information from other Government agencies and, in some cases, from private sources. Revisions are usually made for recent years as additional information becomes available.

This publication was prepared by the staff of the Farm Sector Analysis Section, Economic Indicators and Statistics Branch, National Economics Division, Economic Research Service.

HIGHLIGHTS

The five leading States in farm cash receipts in 1981 were California, at \$13.9 billion; Iowa, at \$10.7 billion; Texas, at \$10.1 billion; Illinois, at \$7.6 billion; and Minnesota, at \$6.9 billion. Iowa, Texas, California, Wisconsin, and Nebraska, in that order, were the five leading States in livestock receipts. California, Illinois, Iowa, Texas, and Minnesota were the top five States in crop receipts.

The leading States in cash receipts for individual commodities were Texas for cattle and calves; Wisconsin for dairy products; Illinois for soybeans; Iowa for corn and hogs; Kansas for wheat; Arkansas for broilers; Texas for cotton; and Idaho for potatoes.

The five leading States in gross farm income before inventory adjustment for 1981 were California, at \$14.6 billion; Iowa, at \$11.8 billion; Texas, at \$11.2 billion; Illinois, at \$8.8 billion; and Minnesota, at \$7.9 billion.

The five leading States in net farm income after inventory adjustment were California, at \$2.9 billion; Iowa, at \$1.9 billion; Minnesota, at \$1.7 billion; Illinois, at \$1.6 billion; and North Carolina at \$1.4 billion. The five leading States in net returns to operators were California, Texas, Florida, Wisconsin, and Minnesota.

Under the balance sheet accounts, the five leading States in assets including farm households were Texas, at \$96 billion; Iowa, at \$81 billion; California, at \$80 billion; Illinois, at \$72 billion; and Minnesota, at \$53 billion. The ranking excluding farm households was Texas, Iowa, Illinois, California, and Minnesota.

The five leading States with total debt including farm households were California, at \$16 billion; Iowa, at \$14 billion; Texas, at \$12 billion; Illinois, at \$11 billion; and Minnesota, at \$10 billion. The rankings remained the same when farm households were excluded.

The Economic Research Service developed procedures in 1980 to measure statistically the economic status of the Nation's farms and farm operator income. Using the new procedures, longstanding data series such as the farm income and farm balance sheet were brought up to date and are continued in this publication.

Two sets of measures of farm income, assets, and debt are included in this publication. One set includes farm households, and Commodity Credit Corporation (CCC) loans are treated as sales. The other set excludes farm households with the CCC loans carried in inventory rather than as sales.

Economic Indicators of the Farm Sector:

State Income and Balance Sheet Statistics, 1981

BACKGROUND

The U.S. Department of Agriculture (USDA) has published a comprehensive set of income estimates relating to agriculture since the midtwenties. The series have been revised and expanded through time, incorporating individual State estimates in 1949 and sales class distributions in 1960. In 1980, new accounts were added which now permit the earnings and financial dimensions of the farm business to be distinguished from farm family income and finances. These accounts, along with the former accounts, are included in this publication.

The new accounts were developed to separate the aggregate accounts in a manner that would permit the earnings of the farm business unit to be distinguished from farm family income and to permit a better analysis of the wealth and income status of the production units and the operators of those units by type of farm, value of sales class, and type of ownership as well as by State as presented in this publication.

The production sector accounts are based on the concept of separating the measurement of the economic viability of the production units (establishments) of the farm sector (a part of the business sector of the national economy) from the well-being of the farm operator families (a part of the household sector of the national economy). Information on the nonfarm assets and debts of farm operators is limited and is not reported in this publication. The agricultural production sector includes farm establishments involved in agricultural production regardless of the source of labor. The production sector is separated from the marketing, processing, and distribution sectors within agriculture.

The terms "farm" and "establishment" represent the places where the production process occurs. The establishment concept used for 1975 and following years is the census farm definition adopted in 1974 which includes places with annual sales, or potential sales, of \$1,000 or more.

Households include all families or individuals receiving income from the agricultural production sector. The main category of households emphasized in this report is farm operators, although

some of the tables also include landlords and employee categories. The operator category includes owners and tenants as well as managers associated with corporate or institutional establishments.

In the format of this publication, the income tables are grouped together in one section (tables 1 through 18) and the balance sheet tables into a second section (tables B1 and B2). The income tables are divided into two groups, with the distinction found in the table heading. One group "excludes Commodity Credit Corporation loans and farm households," while the other group "includes Commodity Credit Corporation loans and farm households." The balance sheet tables are separated into two groups, one "excluding farm households," which is equivalent to farm production assets, and the second group "including farm households."

STATE INCOME ACCOUNTS

Tables 1 through 18 present State farm income statistics. Tables 1 and 2 rank the leading States, by commodities, for cash receipts and the leading commodities for each State, including net Commodity Credit Corporation (CCC) loans.

Farm Production Transactions

Table 3 presents farm production transactions by State. The transactions accounts measure income from agricultural production establishments so that the value added by the farm production sector can be distributed to the institutions or classes of individuals, such as sole proprietors, partnerships, or corporations, controlling the sector's resources. The accounts depict the income-producing process as a series of transactions including various sources of receipts and the allocation of expenses.

In the transactions summary, the residual is returns to operators, and total receipts are designated gross farm receipts. Gross receipts differ from gross farm income in the farm income accounts because the rental value of farm operator dwellings is removed and CCC loans are treated as loans, not sales at the time the loans are made. The Government payments reported in tables 15 through 18 are the same for both accounts.

Production expenses under the production transactions accounts are divided into factor and nonfactor payments. Under nonfactor payments, intermediate production expenses of nonfarm origin include purchased inputs such as fuel, repairs, fertilizer, and pesticides. Intermediate production expenses of farm origin are those for seed, feed, and livestock purchased. Other nonfactor payments include capital consumption and business taxes.

Capital consumption includes depreciation and accidental damage. Depreciation is measured on a replacement value basis rather than purchase price in order to reflect decreases in current market value of the capital stock. Depreciation is lower in the production transactions accounts than the net farm income accounts because the operators' dwellings are not included.

Factor payments are the income available to provide returns to the factors--land, labor, and capital. These returns are interest, wages to hired labor, net rent to all landlords, and returns to operators. Returns to operators are the portion of income left to the operator for returns supplied from labor, management, and capital.

Cash Flow

Cash flow status is an indicator which helps provide some perspective on the short-term financial situation of farmers. Although the wealth and income situation of the average farm operator may be adequate in terms of the farmer's resources, the cash flow may be inadequate to meet current obligations, thus causing financial difficulties. This may not be unusual for beginning farmers and for those who may recently have purchased land financed at interest rates which could cause severe financial stress in periods of unfavorable price relationships.

State cash income differs from the production transactions table in that only cash transactions enter the calculations (table 4). Net inventory change, perquisite rent for hired labor, and home consumption are not cash items and are not included in receipts in table 4. Cash uses include only those expenses that are cash transactions. Capital consumption is a noncash expense and is not included. The perquisites for hired labor are also excluded. Cash income from farming measures the cash available for capital asset purchases, loan retirement, and operator household cash income. Cash income from farming is generally higher than returns to operators, as is shown by comparing the State totals in tables 3 and 4.

Net Farm Income

State net farm income statistics are reported in tables 5 through 14. Net farm income accounts differ from production transactions accounts in that farm household income is included in net farm income and CCC loans are considered sales when the loans are made.

The farm household accounts affect both the income and expenses in net farm income. The imputed rental value of farm operator dwellings is included as income. The expenses for these dwellings are included in repair and operation, interest, taxes, capital consumption, and other miscellaneous expenses.

Cash receipts of the farm production transactions accounts and the net farm income accounts differ by the amount of change in CCC loans adjusted from the loan value to the current market value. Loans liquidated are added into the transactions accounts as receipts in the year the loans are liquidated. These loans have already been counted as receipts in the year the loans were made under the net farm income accounts.

Commodity Credit
Corporation Loans

As noted, CCC loans under the production transactions accounts and the net farm income accounts are treated differently. Under the transactions accounts, CCC loans are treated as loans. If these loans are liquidated (commodities are physically delivered to CCC and the loan canceled) or repaid with the commodity being sold on the open market by the producer, then these loans are considered sales at that time. The net effect is the same for both accounts, but the year in which they are counted as sales may differ. Since the CCC loans are counted as loans in the transactions accounts, the quantities under loan are recorded as inventories. In the net farm income accounts, CCC loans are counted as sales at the time the loan is made and the quantities under loan are not counted in inventory calculations.

Production
Expenses

Production expenses of transactions accounts and net farm income accounts differ in several ways. The expenses of operators' dwellings are included under the net farm income accounts but are excluded under the transactions accounts. Repair and operation, interest, business taxes, capital consumption, and some miscellaneous accounts are higher in the net farm income accounts because they include household expenses. Feed, livestock, seed, fertilizer, electricity, marketing charges, and nonreal estate interest are the same for both accounts. Contract labor is included as a part of wages under the net farm income accounts but is a part of the service accounts--machine hire, custom work, and contract labor--in the transactions accounts. In the net farm income accounts, only net rent to nonoperator landlords is an expense.

STATE BALANCE
SHEET ACCOUNTS

The balance sheet accounts are separated into those "excluding farm households" (table B1) and those "including farm households" (table B2). The accounts "including farm households" are the same accounts as were designated "Balance sheet of the farming sector, by State" in the 1979 statistics published in 1980. Those "excluding farm households" are the same as the tables listed as "new methodology" in the 1979 statistics.

In the balance sheet accounts, when household assets are excluded, so are the operators' dwellings, household portion of automobiles and trucks, household equipment, time deposits, household portion of investment in cooperatives, and U.S. savings bonds. Operators' dwellings make up about two-thirds of the value of the household assets excluded.

Real estate assets make up over 75 percent of total farm assets, and thus the movement of real estate values strongly affects total farm assets.

In the accounts where farm household assets are excluded, the household portion of the debt is also excluded. The portion of the debt attributed to the operators' dwellings, household portion of automobiles and trucks, and household equipment is removed.

While the debt/asset ratio is still quite low, the ratio has been rising over time. In table B2, the ratios for January 1, 1981, range from 26.5 percent for debts as a percentage of assets in Georgia to 8.2 percent in West Virginia. Texas has the lowest percentage, 12.8 percent, for a major agricultural State. The U.S. average is 17.9 percent.

n.a.=not available. 1/ Excludes changes in inventories and represents income of farm operators.
2/ Based on the 1974 Census of Agriculture definition of a farm, which is a farm with sales of
\$1,000 or more.

n.a.=not available. 1/ Includes changes in inventories and represents income of farm operators. Revisions to the United States averages for the years 1970-77 were made after the Economic Indicators of the Farm Sector publication, ECIFS 1-1, was published in August 1982. 2/ Based on the 1974 Census of Agriculture definition of a farm, which is a farm with sales of \$1,000 or more.

Table 9--Footnotes

*Less than 0.05 percent. Percentages may not be accurate to 0.1 in last digit because of method of machine computation.

1/ Except for mohair, the livestock commodities include only State estimates of income for which the Department estimates value of marketing for 1979-81. All other estimates, while included in commodity group totals, are not listed separately but are combined as appropriate in "other livestock" to prevent disclosure of confidential data.

2/ Commodities do not add to group total because broilers, turkeys, and minor commodities--turkey eggs, ducks, geese, guineas, and other poultry as estimated are included in "other livestock" below in order to avoid disclosure of confidential data. All minor commodities may not be estimated in all States.

3/ Cash receipts include value of home consumption.

4/ Commodities do not add to group totals because broilers, turkeys, and mohair for certain States and other minor commodities such as bees, horses and mules, goats, goatmilk, mink and other pelts, rabbits, catfish, reindeer, and other livestock and products when reported are included for all States in "other livestock" in order to avoid disclosure of confidential data.

5/ See footnotes 2 and 4.

6/ Except for rye, barley, corn, oats, sorghum grain, flaxseed, peanuts, soybeans, dry edible beans, dry field peas, potatoes, sweet potatoes, citrus fruit, apples, apricots, avocados, cherries, dates, grapes, peaches, pears, plums and prunes, pecans, sugarcane syrup, alfalfa seed, fescue seed, crimson cloverseed, lespedeza, orchardgrass, red cloverseed, sweet cloverseed, timothy, vetch, popcorn, strawberries, forest products, and greenhouse and nursery products, the commodities include only State estimates of income for which USDA estimates the value of production for 1981. Allowances are made in "other" categories for other States as all other estimates, while included in commodity group totals, are combined as appropriate in "Miscellaneous vegetables," "Other berries," "Other fruits and nuts," or "Other field crops" items.

7/ Includes vegetables produced in the State but for which USDA does not estimate individual values of production.

8/ Includes other melons except honeydews and watermelons.

9/ Gooseberries and other berries.

10/ Includes fruits and nuts produced in the State but for which USDA does not estimate individual values of production.

11/ Sugar and seed crops, mint, hops, popcorn, other field crops, forest products, mushrooms, and greenhouse and nursery products.

12/ Includes sugarcane for sugar in Hawaii.

13/ Includes buckwheat, castor beans, chufas, emmer and spelt, dill for oil, lentils, provo millet, safflower, velvetbeans, wormwood oil, wormseed oil, tung nuts, other grains, other field crops, sugarcane syrup, major field crops in States for which USDA did not estimate values of production for 1981, and the following seeds: alsike clover, alyce clover, Austrian winter peas, birdsfoot trefoil, bluestem grass, bromegrass, bermuda grass, canary grass, carpet grass, cowpeas, crotalaria, dallisgrass, grama grass, hairy indigo, Kentucky bluegrass, lupine, meadow foxtail, millet, mustard, rapeseed, redtop, fescue grass, sesame, sudangrass, sweet corn seed, sugar beet seed, wild winter peas, wheatgrass, broomcorn, and major seeds in States for which USDA did not estimate values of production for 1981.

14/ Fresh only.

15/ Includes seed and other field crops produced in the State but for which USDA does not estimate individual values of production.

16/ Processing only.

17/ Included in "Miscellaneous vegetables" below.

18/ Included in "Miscellaneous fruits and nuts" below.

19/ Included in "Other field crops" below.

20/ An upward revision of \$84,049,000 made in North Dakota's receipts for sugar beets and in turn the State's aggregates for all other crops, and all commodities were not incorporated in the corresponding U.S. aggregates.

21/ Revisions were made in Connecticut's receipts for misc. vegetables and other field crops to correct double counting of mushrooms. In turn, Connecticut's totals for vegetables, all other crops, total crops, and all commodities were not incorporated in the corresponding U.S. aggregates.

Tables 11, 12 13, and 14 —Footnotes

1/ Details may not add to totals because of rounding.

2/ Includes bulbs, plants, and trees.

3/ Repairs and maintenance of buildings, repairs and operation of motor vehicles and other machinery, and petroleum fuel and oil used in the farm business.

4/ Includes cash wages, perquisites, and (1951 to date) social security taxes paid by employers.

5/ Includes binding, cotton ginning, Federal crop insurance, containers, dairy supplies, electricity, greenhouse and nursery products, grazing fees, harness and saddlery, net insurance premiums (fire, wind, and crop hail), irrigation, livestock marketing service (excluding feed and transportation), milk hauling, miscellaneous hardware (including blacksmithing), machine hire and custom work, miscellaneous livestock and poultry supplies, pesticides, small handtools, short-term interest, telephones (business share), veterinary services and medicines (plus insemination), and other miscellaneous.

6/ Less than \$50,000.

7/ Includes depreciation and accidental damage to farm buildings and depreciation of motor vehicles and other farm machinery and equipment.

8/ Minus sign in States reflects a net income position rather than a net expense position.

n.a.=not applicable. 1/ Data are for farms with sales of \$1,000 or more annually. 2/ Preliminary. 3/ All crops held on farms including crops under CCC and crops held off farms by farm operators. 4/ Includes debt owed to institutional lenders and to noninstitutional or miscellaneous lenders. 5/ Nonrecourse CCC loans secured by crops owned by farmers. These crops are included as assets.

AGRICULTURAL OUTLOOK

Tracking the Business of Agriculture...

Agricultural Outlook pools USDA's latest analyses of the agricultural economy in one comprehensive monthly package. Besides its regular outlook coverage—including commodity supply and demand, world agriculture and trade, food and marketing, farm inputs, agricultural policy, transportation and storage, and related developments in the general economy—Agricultural

Outlook is USDA's official outlet for farm income and food price forecasts. While emphasizing short-term outlook information, the magazine also publishes special reports containing long-term analyses of topics ranging from international trade policies to U.S. land use and availability. Agricultural Outlook averages 48 pages and includes 6 pages of updated charts and 20 pages of statistical tables.

Annual subscription: \$31.00 U.S., \$38.50 foreign. A 25-percent discount is offered on orders of 100 copies or more to one address. Order from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Make check payable to Superintendent of Documents. Allow 6 to 8 weeks for delivery.

Earnings

Economic Indicators of the Farm Sector:

Production and Efficiency
Statistics, 1979

Expenses

Keep tabs on farm income and expenses with the *Economic Indicators of the Farm Sector* series.

This series of five separate reports, offered now on a subscription basis, explores the economic status of U.S. farms to give you a comprehensive update on where U.S. agriculture is headed.

Here are the titles you will be receiving:

- Income and Balance Sheet Statistics
- State Income and Balance Sheet Statistics
- Farm Sector Review
- Production and Efficiency Statistics
- Costs of Production

Subscriptions may be purchased from:
